European NPL Disposal Monitor

Which banks face pressure to sell loan portfolios, and which have actually stated disposal intent?

Regulatory screen plus partially verified disclosure corpus | 5 November 2026

THE RESULT The dated 2025-Q2 screen highlights Germany's Stage 2 share of 13.5% alongside 35% NPL coverage. Only 4 of 48 banks have verified quotes, across 13 passages. The verification gate rejects altered or fabricated passages; unread banks remain intent-unconfirmed.

APPROACH

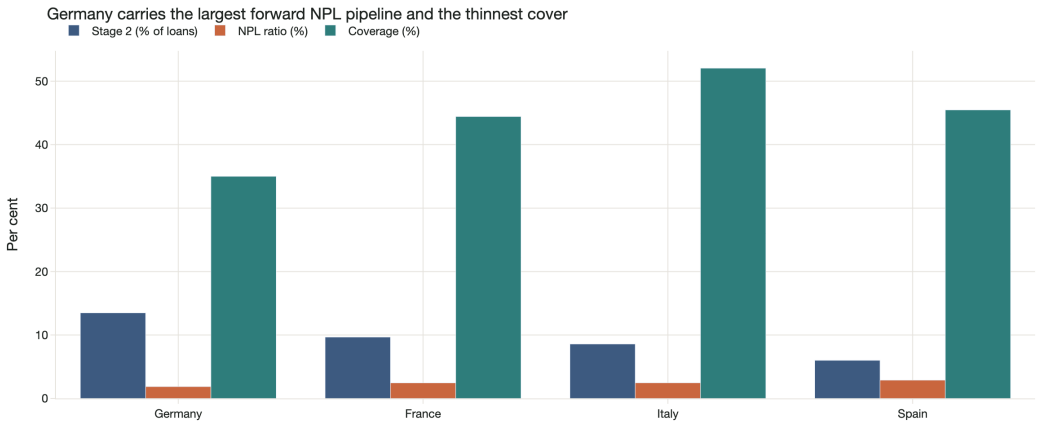

Four percentile-ranked balance-sheet factors measure pressure across 48 banks. Coverage is shown separately as transaction readiness. Disclosure harvesting, verbatim PDF verification and classification are separated before pressure and intent are crossed into a sourcing view.

SCOPE & LIMITATIONS

This is relative ranking, not a calibrated sale probability. Verified intent coverage is narrow; the UK is absent. Country averages do not identify a bank's future sale. A verified quotation proves location, not the investment interpretation or completeness of search.

EXPLORE

Open docs/dashboard.html and docs/one-pager.html. Inspect the verified corpus and promotion script; EBA download is large and the model key is optional.

EBA 2025-Q2 reporting snapshot; four-country screen.
